## JOFRACAL CALIBRATION SOFTWARE

### Compatible with 2010 software release

JOFRACAL calibration software ensures easy calibration of RTD's, thermocouples, transmitters, thermoswifts, pressure gauges and pressure switches. JOFRACAL can be used with JOFRA DPC-500, HPC600, HPC500, HPC502 and IPI pressure calibrators, all JOFRA temperature calibrators, as well as JOFRA AMC910, ASC300 multi signal calibrator and ASM-800 signal multi scanner. When used with JOFRA ASM-800 signal multi scanner, JOFRACAL can perform a simultaneous semiautomatic calibration of up to 24 pressure and/or temperature devices under test in any combination.

JOFRACAL software controls the complete calibration procedure, stores the results and provides a calibration audit trail through hard-copy certificates. All calibration data are stored for each sensor to monitor drift and optimize recalibration intervals. A scheduler feature allows planning of future calibrations.

The JOFRACAL temperature calibration software may be downloaded free of charge from our website.
